### City and Public Safety Departments

Municipalities are being inundated with lawsuits and allegations of misconduct or officers negligence. These lawsuits cost our cities and taxpayers millions of dollars per year in court awards and resources required to defend these suits. These lawsuits generally come down to "he said, she said" with the accuser holding the sympathy card. This puts the officer and the city at a significant and costly disadvantage. By providing the officer with an on demand video and audio recording device that allows the officer to easily record any confrontation or incident, the city officials will have taken a significant step towards mitigating these unforeseen costs. From a risk analysis standpoint the Return on Investment is probably higher than any other piece of technology the city or agency can purchase. Saving hundreds of thousands or even millions of dollars in outlandish awards is well within reason. These video products are low cost, light weight, easy to wear, reliable, and do not interfere with the officers' ability to perform his duties. As expected, they provide excellent audio and video quality for the price.

### Officers

Public Safety Officers are often unjustly accused by a citizen or felon with little or no evidence of wrong doing except for the word of the accuser. Until recently, the officer had very little in the way of technology to document the officers' side of the story. As a result, the officer not only had his professional integrity openly questioned in court, the officer's career could be terminated or a black mark so significant was placed in their file that further advancement was impossible. Just as the gun and bullet proof vest protect the officer from bodily harm, these new wearable video cameras can protect the officers' career and reputation by documenting his side of the story.

For the same reason most patrol cars now have video cameras hard mounted, an officer needs a soft mounted video camera as well. An officer rarely does all his work in the front of his patrol car. If he steps to the side of the car mounted camera, if he is in a crowd, if he enters a building, or any other situation that takes him away from the view line of the car camera you lose all the benefit of that camera and the reason you had it in the first place. It's not the car camera that matters; it's the officers' interaction and reaction to situations you need to capture. And the only way to accomplish this is by having the video camera on the officer.

### Video Specifications

- Up to 160 minutes of video/audio recording
- Video frame rate of 30 fps (frames per second)
- 640 x 480 picture resolution for video in AVI format
- 1280 x 1024 for resolution for photos taken in camera mode
- 1.3 megapixel video output
- 4GB internal flash memory

### Computer Requirements & Connectivity

- Easy connection to PC/Laptop, no external driver required (except for Windows 98)
- Supports Windows 98, SE, ME, 2000, XP, Vista, 7 & Linux
- Supports USB 2.0 and 1.1

### Battery Information & Recorder Dimensions

- Built-in rechargeable Lithium-Ion battery
- Up to 10 hour battery life per charge (approximate)
- Dimensions: 3 3/8" long x 2 1/4" wide x 3/8" deep
